VID ISSUES ANNUAL WATER QUALITY REPORT

Vista, CA—

The Vista Irrigation District (VID) has begun distribution of its Consumer Confidence Report, also known as the water quality report, to its customers in the city of Vista, and portions of San Marcos, Escondido, Oceanside, and unincorporated areas of the county of San Diego.

In 2008, as in past years, VID met all drinking water standards. Last year, we conducted more than 12,000 tests for over 75 drinking water constituents. We did not have any constituents that exceeded state or federal standards on any of these tests.

The Consumer Confidence Report provides a snapshot of last year's water quality. The report includes details about where your water comes from, what it contains, and how it compares to state standards. The report follows Department of Public Health's Guidance for Consumer Confidence Reports dated January 1, 2009.

If you are a bill paying VID customer, watch for a copy of the Consumer Confidence Report in the mail. Other consumers and interested parties may obtain a copy of the report by calling (760) 597-3100, visiting the district's office located at 1391 Engineer Street in Vista, or by visiting the VID's web site, www.vid-h2o.org, and selecting the 2008 Consumer Confidence

Report link located in the on-line publications section of the website.

If you have questions about the Consumer Confidence Report, please contact our water laboratory coordinator at (760) 597-3143.

The Vista Irrigation District is a public agency governed by an elected five-member board. The district provides water service to more than 123,000 people in the city of Vista, and portions of San Marcos, Escondido, Oceanside, and unincorporated areas of the county of San Diego.
