VID ISSUES ANNUAL WATER QUALITY REPORT

District's tap water meets all federal and state safe drinking water standards.

Vista, CA—

The Vista Irrigation District (VID) has begun distribution of its Consumer Confidence Report, also known as the water quality report, to its customers in the city of Vista, and portions of San Marcos, Escondido, Oceanside, and unincorporated areas of the county of San Diego.

In 2010, as in past years, the district's tap water met all federal and state safe drinking water standards.

The Consumer Confidence Report provides a snapshot of water quality, showing the results of monitoring for the period January 1, 2010 through December 31, 2010. The report includes details about where the district's water comes from, what it contains, and how it compares to state standards. The report follows California Department of Public Health's Guidance for Consumer Confidence Reports dated January 1, 2011.

If you are a bill paying VID customer, watch for a copy of the Consumer Confidence Report in the mail. Other consumers and interested parties may obtain a copy of the report by calling (760) 597-3100, visiting the district's office located at 1391 Engineer Street in Vista, or by visiting the district's web site, www.vid-h2o.org, and selecting the 2011 Consumer Confidence Report link located in the on-line publications section of the website.

If you have questions about the Consumer Confidence Report, please contact our water laboratory coordinator at (760) 597-3143.

The Vista Irrigation District is a public agency governed by an elected five-member board. The district provides water service to more than 125,000 people in the city of Vista, and portions of San Marcos, Escondido, Oceanside, and unincorporated areas of the county of San Diego.
